MONTHLY ELECTRICITY STATISTICS

May 2015

HIGHLIGHTS

May 2015 vs. May 2014

Total OECD production reached 803.4 TWh in May 2015, a decrease of 0.5% or 3.9 TWh over the same month last year.

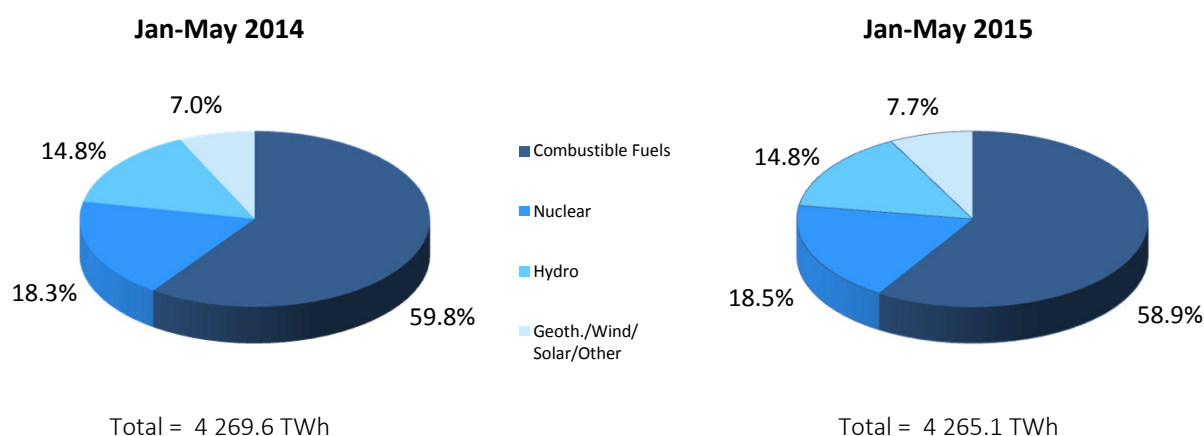

- Production from Combustible Fuels fell by 3.4% in the OECD, compared to May 2014, with falls in all regions: 7.3%, 4.1% and 1.2% in OECD Europe, OECD Asia Oceania and OECD Americas respectively.
- Production from Geoth./Wind/Solar/Other grew by 18.8% in the OECD, compared to May 2014. It increased in all regions, by 22.6%, 18.7% and 13.5% in OECD Europe, OECD Asia Oceania and OECD Americas respectively.

January - May 2015 vs. the same period in 2014

Total OECD production reached 4 265.1 TWh, a decrease of 0.1% or 4.5 TWh over the same period last year.

- Electricity supply for the months January – May 2015 remained almost steady, compared to the same period in 2014. This is explained by reductions of 1.3% and 0.8% in OECD Asia Oceania and OECD Americas respectively, compensated by an increase of 1.9% in OECD Europe.
- The share of electricity production from Combustible Fuels fell by 0.9 percentage points, while that of Geoth./Wind/Solar/Other and Nuclear grew by 0.7 and 0.2 percentage points respectively. Share of production from Hydro remained constant.

OECD Electricity Production by Fuel Type Year-to-Date Comparison

1. Percentage change over corresponding period (beginning of year to current month) of previous year.

2. Share of electricity production by fuel type.

- Electricity production was 803.4 TWh in May 2015.
 - This was lower by 3.9 TWh, or 0.5%, compared to May 2014.
 - This was an increase of 23.7 TWh, or 3%, compared to the previous month.
 - Combustible Fuels production grew by 3.6%, an increase of 15.8 TWh, compared to the previous month.
- Total production for the year-to-date was 4 265.1 TWh. Comparing this to the same period last year shows that:
 - Total production was lower by 4.5 TWh, or 0.1%.
 - Combustible Fuels production reduced by 1.6%, a decrease of 40.7 TWh, compared to the same period last year.
 - Geoth./Wind/Solar/Other production showed an increase of 9.2% or 27.7 TWh.
 - Trade volume increased by 18.1 TWh, or 4.6%.

= Electricity Supplied	402.7	374.8	412.8	2 066.5	-0.8%		5 100	

1. Percentage change over corresponding period (beginning of year to current month) of previous year.

2. Share of electricity production by fuel type.

- Electricity production was 402.1 TWh in May 2015.
 - This was lower by 1.9 TWh, or 0.5%, compared to May 2014.
 - This was an increase of 27.9 TWh, or 7.5%, compared to the previous month.
 - Combustible Fuels production grew by 11.9%, an increase of 26.4 TWh, compared to the previous month.
- Total production for the year-to-date was 2 063.9 TWh. Comparing this to the same period last year shows that:
 - Total production was lower by 19.3 TWh, or 0.9%.
 - Combustible Fuels production reduced by 2.9%, a decrease of 37.0 TWh, compared to the same period last year.
 - Nuclear production showed the largest percentage change by energy source, being 4.3% higher.
 - Geoth./Wind/Solar/Other production showed an increase of 1.7% or 1.9 TWh.
 - Trade volume increased by 8.9 TWh, or 14.6%.

Electricity Production

Electricity Production by Fuel Type

COUNTRY NOTES:

- OECD Americas includes Canada, Chile, Mexico and the United States.

1. Percentage change over corresponding period (beginning of year to current month) of previous year.

2. Share of electricity production by fuel type.

- Electricity production was 6 302 GWh in May 2015.
 - This was higher by 206 GWh, or 3.4%, compared to May 2014.
 - This was an increase of 390 GWh, or 6.6%, compared to the previous month.
 - Combustible Fuels production grew by 8.9%, an increase of 384 GWh, compared to the previous month.
- Total production for the year-to-date was 30 495 GWh. Comparing this to the same period last year shows that:
 - Total production was higher by 266 GWh, or 0.9%.
 - Combustible Fuels production reduced by 1.8%, a decrease of 389 GWh, compared to the same period last year.
 - Geoth./Wind/Solar/Other production showed an increase of 111.4% or 478 GWh.

Electricity Production

Electricity Production by Fuel Type

COUNTRY NOTES:

- Net production is estimated from monthly submission of gross production.
- Annual data for 2014 were estimated by the IEA Secretariat.

= Electricity Supplied	25 250	24 382	26 988	128 643	0.0%		311 935	

1. Percentage change over corresponding period (beginning of year to current month) of previous year.

2. Share of electricity production by fuel type.

- Electricity production was 22 587 GWh in May 2015.
 - This was higher by 236 GWh, or 1.1%, compared to May 2014.
 - This was an increase of 1 659 GWh, or 7.9%, compared to the previous month.
 - Combustible Fuels production grew by 2.1%, an increase of 261 GWh, compared to the previous month.
- Total production for the year-to-date was 109 027 GWh. Comparing this to the same period last year shows that:
 - Total production was lower by 349 GWh, or 0.3%.
 - Combustible Fuels production grew by 5.6%, an increase of 3 741 GWh, compared to the same period last year.
 - Hydro production showed the largest percentage change by energy source, being 22.4% lower.
 - Geoth./Wind/Solar/Other production showed an increase of 7.1% or 1 327 GWh.
 - Trade volume increased by 3 142 GWh, or 15.3%.

Electricity Production

Electricity Production by Fuel Type

COUNTRY NOTES:

- Includes San Marino and the Vatican.
- Monthly reporting does not include production from other non combustible fuels, therefore it is estimated by the IEA Secretariat based on annual submission.

 - This was an increase of 116 GWh, or 5.7%, compared to the previous month.
 - Nuclear production grew by 11.5%, an increase of 116 GWh, compared to the previous month.
- Total production for the year-to-date was 10 865 GWh. Comparing this to the same period last year shows that:
 - Total production was higher by 771 GWh, or 7.6%.
 - Nuclear production reduced by 1.9%, a decrease of 113 GWh, compared to the same period last year.
 - Hydro production showed the largest percentage change by energy source, being 44.9% higher.
 - Trade volume increased by 37 GWh, or 0.4%.

Electricity Production

Electricity Production by Fuel Type

COUNTRY NOTES:

- Monthly reporting does not include production from wind, solar and other non-combustible fuels, therefore they are estimated by the IEA Secretariat based on annual submission.

1. Percentage change over corresponding period (beginning of year to current month) of previous year.

2. Share of electricity production by fuel type.

- Electricity production was 324 090 GWh in May 2015.
 - This was lower by 1 406 GWh, or 0.4%, compared to May 2014.
 - This was an increase of 29 137 GWh, or 9.9%, compared to the previous month.
 - Combustible Fuels production grew by 13.4%, an increase of 25 342 GWh, compared to the previous month.
- Total production for the year-to-date was 1 645 962 GWh. Comparing this to the same period last year shows that:
 - Total production was lower by 19 975 GWh, or 1.2%.
 - Combustible Fuels production reduced by 2.9%, a decrease of 32 283 GWh, compared to the same period last year.
 - Nuclear production showed the largest percentage change by energy source, being 3.6% higher.
 - Geoth./Wind/Solar/Other production showed an increase of 1.6% or 1 597 GWh.
 - Trade volume increased by 6 137 GWh, or 20.5%.

Electricity Production

Electricity Production by Fuel Type

COUNTRY NOTES:

- Includes the 50 States and the District of Columbia.

PRINCIPLES AND DEFINITIONS

The IEA's Monthly Electricity Statistics provides timely electricity production and trade data for member countries of the Organisation for Economic Co-operation and Development (OECD). It aims to report as up-to-date and consistent information as possible for the last three months. It also provides previous annual data and year-to-date indicators.

General notes

- Electricity production and trade data are reported at the individual country level as well as in organisational and regional groupings. These groupings include: OECD Total, OECD Americas, OECD Asia Oceania, OECD Europe and IEA Total.
- The units are terawatt hours (TWh) for the regional groupings and gigawatt hours (GWh) for the individual countries.
- The grouping of electricity generation by source reflects available monthly data and/or small individual quantities.
- Definitions are consistent with the IEA's "Electricity and Heat" annual questionnaire. Statistics are subject to revision on official receipt of the annual questionnaire from national administrations or on improved data becoming available.
- To enable timely publication, the IEA may supplement national statistics with data from other sources.
- Where adequate information is not available from external sources, estimates have been made by the IEA. Methodological notes are provided in individual country pages.
- Monthly data are consistent with those provided in the quarterly "Oil, Gas, Coal and Electricity" book published by the IEA.
- All figures for individual countries are reported to the nearest whole number and totals may not equal the sum of components due to rounding.
- Note that historic data are often recalculated. Therefore, the latest publication should be considered the most accurate. Regional and organisational summaries may also change based on country recalculations.

Basic definitions

<i>Production</i>	Net generation excludes power station own use.
<i>Combustible Fuels</i>	Production from fossil fuels (primary coal, coal products, peat and peat products, oil shale and oil sands, crude oil, NGL, petroleum products, natural gas), combustible renewables and wastes (solid biofuels, biogases, liquid biofuels, industrial and municipal waste) and other combustible fuels.
<i>Nuclear</i>	Electricity produced using heat generated from nuclear fission.
<i>Hydro</i>	Net generation from hydro facilities including pumped storage production.
<i>Geoth./Wind/Solar/Other</i>	Generation from geothermal, solar photovoltaic, solar thermal, wind, tide, wave, ocean and other non-combustible sources.
<i>Indigenous Production</i>	The sum of electricity production by energy source.
<i>Imports/ Exports</i>	Amounts of electricity that have crossed political boundaries of the country, whether customs clearance has taken place or not.
<i>Electricity supplied</i>	Indigenous production + Imports - Exports. It includes transmission and distribution losses.
<i>Year</i>	Calendar year (January to December) unless otherwise stated.
<i>Year-to-Date</i>	The sum of all months from the start of the calendar year to the latest month.

Publication details and further information

- This publication is released in the middle of each month onto the IEA's Website:
<http://www.iea.org/statistics/topics/Electricity/>
- Subscriptions to this publication are available at <http://mailing.iea.org>
- Data should not be reproduced for publication without permission of the IEA.
- Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
